

Advance Haemorrhoids: Last Line – Personalized, Purposeful, Predictable and Precise Fibrosis

Parshottambhai B Patel MS

Shiv Shraddha Nursing Home, Ahmedabad, Gujarat, India

Abstract:

Introduction: Grade III and IV highly vascular hemorrhoids with Secondary haemorrhoids - (between the anal cushions) and Circumferential and Circumferentially Protruding Haemorrhoids with external haemorrhoids is challenging problem for both surgeon and patient. Surgery is a only option

Open haemorrhoidectomy (Milligan Morgan) remains the gold standard for surgical intervention for haemorrhoids and is the still most popular technique. Other popular options are Closed hemorrhoidectomy (Ferguson), Submucosal technique of Parks and many other

However haemorrhoidectomy is recognised as a painful procedure with a risk of significant complications and remains unpopular.

Primary and secondary haemorrhage, retention of urine, wound infection, incontinence, and anal stenosis are common.

Biography:

Parsottambhai Patel MS is Surgeon and cancer specialists. practicing last 34 years. Primary focus is on anorectal diseases, breast and head and neck cancer. Primary focus is prevention and early detection of cancer. He has written one book and more than 15 educational booklets. He has taken more then 1000 lacturs all over state of Gujarat. He is also distributing educational information with actionable information in a way which is easy to understand.
