

Detection of Gastroesophageal Reflux and Symptom Association in Children with Esophageal Atresia by Combined Video, Multichannel Intraluminal Impedance and pH Study

Palittiya Sintusek

Chulalongkorn University, Bangkok, Thailand

Abstract:

BACKGROUND

Children with esophageal atresia (EA) have risk of gastroesophageal reflux disease (GERD), suggesting reflux monitoring for prompt management.

AIM

To evaluate GERD in children with EA and specific symptom association from video MII-pH study.

METHODS

Children diagnosed with EA with suspected GERD and followed up at King Chulalongkorn Memorial Hospital between January 2000 and December 2018 were

Biography: Assistant Professor Palittiya Sintusek is lecturer and consultant of pediatric gastroenterology and hepatology at King Chulalongkorn Memorial Hospital, Chulalongkorn University, Thailand. Palittiya graduated medical degree (MD) from Chulalongkorn University and MSc from University College London, UK.
